## **Connected, But Alone?**

**By: Sherry Turkle**

In this busy season it is possible to still 'be alone'. We see people busy on their devices but are we really connected in relationships? Ms. Turkle; author, cultural analyst, and MIT professor, "studies how our devices and online personas are redefining human connection and communication -- and asks us to think deeply about the new kinds of connection we want to have." This stimulating discussion will be centered around how technology is shaping our modern relationships not only with others but with ourselves.
